Deep Dive: Sample Explanation of a Common Question

Question: Explain why the sky appears blue during the day.

Ratna Sagar Class 8 Science Answer:

The blue appearance of the sky is primarily due to a phenomenon called scattering of light, specifically Rayleigh scattering. When sunlight reaches Earth?s atmosphere, it is composed of various colors, each with different wavelengths. Shorter wavelengths (blue and violet) are scattered more effectively by the molecules and tiny particles in the atmosphere compared to longer wavelengths (red, orange).

Since our eyes are more sensitive to blue light and because some violet light is absorbed by the upper atmosphere, the scattered blue light fills the sky, giving it its characteristic color during the daytime. This scattered light from all directions makes the sky appear blue to us.
