Step 1: Consult the Fuse Diagram

- The fuse box cover or the vehicle owner manual provides a diagram.
- Identify the fuse related to the component (e.g., headlights, radio).
- Check the fuse number and amperage rating.

Step 2: Inspect the Fuse

- Carefully remove the fuse using your fingers or a fuse puller.
- Examine the fuse window; a broken or blackened fuse indicates it's blown.

Step 3: Replace the Fuse

- Obtain a replacement fuse of the same amperage rating.
- Insert the new fuse into the correct slot, ensuring it's seated firmly.
- Reassemble the fuse cover and test the component.
