Egyptian military campaigns often aimed at expansion or securing vital trade routes. Their offensive tactics included:

- Chariot-based assaults: Chariots allowed rapid movement and surprise attacks, especially during the New Kingdom period.
- Massed infantry attacks: Organized foot soldiers, often armed with spears and shields, formed the backbone of assaults.
- Siege warfare: Though less documented, evidence suggests Egyptians used siege tactics to capture fortified cities, including battering rams and sappers.

Use of Chariots in Warfare

The chariot revolutionized Egyptian warfare from the 16th century BCE onward:

- Mobility and speed: Chariots enabled quick strikes and flanking maneuvers.
- Psychological impact: Their presence on the battlefield intimidated enemies, especially as the chariot was associated with divine power.

- Tactical formations: Chariots often operated in coordinated units, supporting infantry and archers.

Battlefield Formations and Tactics

- Line formation: Egyptian armies typically arranged their troops in lines, with archers in the rear and spear-armed infantry in the front.
- Flanking maneuvers: Chariots and light infantry would target enemy flanks to break their formations.
- Use of ambushes: Egyptian troops sometimes set ambushes in narrow passes or desert terrain to catch enemies off guard.

Weapons of the Ancient Egyptians

The arsenal of Egyptian warriors evolved significantly over centuries, reflecting technological advances and contact with other civilizations.

Primary Weapons

- Spears: The most common weapon, used for throwing or thrusting. Varieties included short spears for close combat and longer ones for throwing.
- Bows and Arrows: The Egyptians developed powerful composite bows, capable of firing accurately over long distances. Archery was a crucial element in both offense and defense.
- Swords and Daggers: While swords were less common initially, they became prominent during later periods, especially in New Kingdom armies. The sickle-shaped khopesh was both a weapon and symbol of authority.
- Axes: Used both as tools and weapons, axes were effective in close combat.

Chariots and Mounted Warfare

- Chariots: Typically two-wheeled, lightweight, and pulled by donkeys or horses (introduced around the Second Intermediate Period).
- Features: Equipped with a platform for a driver and an archer or spearman.
- Impact: Allowed rapid deployment of troops and projected military power across larger distances.

Defensive Equipment

- Shields: Large, rounded shields made from wood and animal hide protected soldiers from projectiles and melee attacks.
- Armor: Early Egyptian soldiers relied on linen tunics and shields; later, leather and metal armor appeared, especially in the New Kingdom.

Innovations and Foreign Influences

- Contact with Hyksos, Hittites, and other civilizations introduced new weapons and tactics, such as:
 - Bronze and iron weaponry
 - Composite bows with greater range and power
 - Chariot design improvements

Ideology and Military Philosophy

The military in ancient Egypt was not solely a matter of tactical prowess but was deeply intertwined with religious beliefs, political ideology, and divine authority.

Divine Mandate and the Pharaoh's Role

- The Pharaoh was considered a divine warrior, embodying Ma'at (truth, balance, order).
- Military campaigns were often framed as divine missions to uphold Ma'at against chaos and external threats.
- Pharaohs depicted as gods or divine warriors in reliefs and inscriptions reinforced their authority and divine right to command armies.

Religious Justification for Warfare

- Battles often had religious significance, seen as battles between Ma'at and chaos (Isfet).
- Temples and religious texts portrayed victorious campaigns as divine favor, legitimizing military actions.
- Rituals and ceremonies before campaigns aimed to invoke divine blessing.

Military Organization and Hierarchy

- The Egyptian army was organized into units, including:
 - Chariot crews

- Infantry battalions
- Specialized units (archers, siege engineers)
- High-ranking officers often held titles associated with divine or religious authority, emphasizing the sacred nature of their roles.

Training and Morale

- Soldiers were trained from a young age, often as part of the royal or noble class.
- Religious symbolism, such as amulets and inscriptions, played a role in boosting morale.
- The promise of divine favor and eternal life motivated soldiers to fight valiantly.

Evolution of Warfare and Weapons Over Time

Egyptian warfare tactics and weaponry saw significant developments from the Early Dynastic Period through the New Kingdom.

Early Period (c. 3100?2050 BCE)

- Simple weapons like spears, bows, and rudimentary shields.
- Warfare mainly defensive, with limited expansion.

Middle Kingdom (c. 2050?1650 BCE)

- Increased use of chariots.
- Fortifications improved; more organized armies.

New Kingdom (c. 1550?1070 BCE)

- Peak of Egyptian military power.
- Deployment of advanced chariots, composite bows, and iron weapons.
- Campaigns led by notable pharaohs like Thutmose III and Ramses II.

Later Periods

- Decline in military superiority due to internal strife and external invasions.
- Adoption of foreign weapons and tactics, including those from Assyrians and Persians.
