- Continue routing around the idler pulley, ensuring it is correctly positioned to maintain tension.

Step 3: Engaging the Blades

- Wrap the belt around each blade pulley, aligned with the corresponding blade.

Step 4: Tensioning

- Ensure the belt passes over the tensioner pulley or arm, which applies tension to prevent slipping during operation.

Step 5: Final Routing

- Double-check the routing path, ensuring the belt is seated properly in all pulley grooves.
